## Islamic Will

### Testator's Asset & Finance Identifier

## Introduction:

This document acts as an addendum to a Signed Islamic Will to ensure that all of a testator’s Assets and Financial Dealings are clearly identified to make distribution of his/her estate easier after their demise. Shaykh Yusuf Shabbir has written an excellent article explaining the importance of this exercise which can be found on the following link.

<https://nawadir.org/2010/08/01/do-you-know-what-you-own/>

Ensure that an Islamic Will is also signed and an instruction placed in it to refer to this addendum. 1<sup>st</sup> Ethical have developed an Islamic Will Template which can be downloaded from the following location below, but any Islamic Will Template can be used from a reliable source.

As and when Asset and Financial Information changes, this document should be kept updated. There is a further section in this document which contains information about household bills, direct debits, charity payments etc. which will make it easier for surviving members of the household to handle the finances. There are many instances where this information is only known by a single member of the family and this could cause problems if they passed away without passing this information on.

The information in this document will be extremely sensitive so it is advised that this is kept in a safe and secure location at all times, preferably with the Signed Islamic Will.
